Subject: TAPR.ORG Down and now Back

TAPR.ORG was down on Saturday for a system upgrade. We installed a new processor board as well as added more memory and a new 9G HD.

Sunday morning very early, the root drive crashed and burned. Lee spent Sunday and today (Monday) recovering from the crash on root. We had backed up the system just before the upgrade, so we didn't get hit very hard. We took this time to also upgrade the OS on the system, which we had planned to in the future.

Lee got the system back operational about 6pm tonight and all aspects of the system should be operational by this posting. We will be spending the rest of tonight doing checks on various automatic operations to make sure that everything is running correctly.

Cheers - Greg
